Оценочные материалы для проведения входного контроля

Входной контроль (применяемая технология – тестирование)

Входной контроль проводится с целью определения уровня языковой подготовки более точного, чем тот, который следует из школьных отметок по иностранному (английскому) языку и определения дорожной карты обучения иностранному языку.

Технология входного контроля предполагает проведение тестирования.

Оценивание входного тестирования осуществляется по номинальной шкале – за правильный ответ к каждому заданию выставляется 1 балл, за не правильный – 0 баллов. Таким образом, максимальное количество баллов, которое можно набрать в данной работе – 18.

Тест считается пройденным (оценка «зачтено») при общей оценке 72% (13 правильных ответов)

18 – 17 баллов – оценка 5 (94% - 100%)

15 – 17 баллов – оценка 4 (83% - 93%)

13 – 14 баллов – оценка 3 (72% - 82%)

Количество попыток прохождения теста – одна. Время прохождения теста – 40 минут.

Инструкция по выполнению теста

Ответы к заданиям выполняются в форме теста (например: 1 с)

Писать работу следует чётко и разборчиво, не допуская исправлений и помарок.

Перед началом работы рекомендуется указать фамилию, имя, отчество и группу.

Выполнение разноуровневых упражнений и заданий реконструктивного характера.

Критерии оценивания

Разноуровневые задания делятся по уровню сложности на репродуктивные, реконструктивные и творческие. Задания разного уровня предлагаются студентам в зависимости от уровня их подготовки.

При выполнении заданий репродуктивного и реконструктивного каждый правильный ответ оценивается в 1 балл.

В процентном соотношении оценки выставляются по 4-балльной системе следующим образом:

“неудовлетворительно”- менее 75%

“удовлетворительно”- 76%-85%

“хорошо”- 86%-92%

“отлично”- 93%-100%

Критерии оценивания выполнения заданий творческого уровня (максимальное количество баллов - 15)

8 Read what Janey and Silvio write about their parents. Are the sentences true (T) or false (F)?

My parents are great. They are very fair and they always discuss things with us. Dad worries about his little girls but Mum likes to give us enough freedom to learn from our mistakes. The only rule is that I must tell them where I'm going and who I am with. I think my parents have got it right: they are interested in us but they don't want to control us.

Janey 16

My parents were too careful – they worried about me and my two brothers all the time. Our parents both had terrible childhoods so they wanted ours to be perfect. Every minute of our lives was spent doing expensive things – we never got time to be kids just playing on our bikes in the street. What they don't understand is that we didn't want our childhood to be perfect – we wanted it to be normal. We were spoilt and I don't think they taught us the value of working for things. I learned that when I left home and started to spend my own money!

Sikorsky Igor Ivanovich was a well-known aircraft engineer and manufacturer.

Sikorsky was born in 1889 in Kiev, in the Ukraine, and got his education at the naval college in St. Petersburg, and later in Kiev and Paris. He was the first to make experiments in helicopter design. In 1913 he designed, built, and flew the first successful aeroplane. Later he built military aircrafts for Russia and France.

In 1919 Sikorsky moved to the United States and later helped to organize an aircraft company that produced a series of multiengine flying boats for commercial service. Sikorsky became an American citizen in 1928. In the late 1930s he returned to developing helicopters and produced the first successful helicopter in the west. Helicopters designed by Sikorsky were used mostly by the US Army Air Forces during World War II. He died in 1972 at the age of 83.

Tupolev Andrey Nikolayevich, famous aircraft designer, was born in 1888. He graduated from the Moscow Higher Technical School, where he designed the first Russian wind tunnel. He helped to found the Central Aerohydrodynamics Institute in 1918 and later worked as the head of its design bureau. During his career he directed the design of more than 100 military and commercial aircraft, including the TU-2 and TU-4 bombers used in the World War II. In 1955 he designed the TU-104, the first passenger jet airliner. His TU-144 supersonic jet liner began its commercial passenger flights in 1977.

КЕУ: Сикорский Игорь Иванович был известным авиаконструктором и фабрикантом. Сикорский родился в 1889 году в Киеве, на Украине, и получил образование в Морском училище в Санкт-Петербурге, а затем в Киеве и Париже. Он был первым, кто проводил эксперименты в конструкции вертолетов. В 1913 году он спроектировал, построил и поднял в воздух первый успешный самолет. Позже он строил военные самолеты для России и Франции.

В 1919 году Сикорский переехал в Соединенные Штаты и позже помог организовать авиастроительную компанию, производившую серию многомоторных летающих лодок для коммерческой эксплуатации. Сикорский стал гражданином США в 1928 году. В конце 1930-х он вернулся к разработке вертолетов и произвел первый успешный вертолет на Западе. Вертолеты, спроектированные Сикорским, в основном использовались ВВС США во время Второй мировой войны. Он умер в 1972 году в возрасте 83 лет.

Туполев Андрей Николаевич, известный авиаконструктор, родился в 1888 году. Окончил Московское высшее техническое училище, где сконструировал первую российскую аэродинамическую трубу. Он помог основать Центральный аэрогидродинамический институт в 1918 году, а затем работал начальником его конструкторского бюро. За свою карьеру он руководил проектированием более 100 военных и гражданских самолетов, в том числе бомбардировщиков ТУ-2 и ТУ-4, использовавшихся во время Второй мировой войны. В 1955 году он сконструировал Ту-104, первый реактивный пассажирский авиалайнер. Его сверхзвуковой реактивный лайнер Ту-144 начал свои коммерческие пассажирские полеты в 1977 году.

<p>Тема 10. Современный мир профессий. Проблемы выбора профессии. Роль иностранного языка в вашей профессии.</p>	<p>Presentation: Profession</p> <ol style="list-style-type: none"> 1 Professions Every man to his trade As is the workman, so is the work If a job is worth doing, it’s worth doing well Practice makes perfect A cat in gloves catches no mice 2 Definition of 'profession' Word Frequency profession (prəˈfeʃən) Word forms: plural professions 1. COUNTABLE NOUN [oft by NOUN]A profession is a type of job that requires advanced education or training. Harper was a teacher by profession. Only 20 per cent of jobs in the professions are held by women. Synonyms: occupation, calling, business, career 2. COUNTABLE NOUN [with singular or plural verb]You can use profession to refer to all the people who have the same profession. The attitude of the medical profession is very much more liberal now. 3 What is a Profession? A profession refers to an occupation that requires specialized education, knowledge, training and ethics. Although professionals make their living in what they do, this paid work is often more than just a job or occupation alone. Whether the occupation is law, medicine, plumbing, writing, interior design or baseball, those who are in it are expected to meet and maintain common standards. Professions are, ideally, made up of people with high ethical standards who have special knowledge and skills. The responsibility of people in certain occupations to the public is an important distinction from those who may participate in the fields on an amateur or non-professional basis. 4 A profession is an activity that requires long and special training. Moreover, in most cases, the development of specialization occurs at the theoretical level, and the application of the acquired knowledge is carried out already in the process of work. This is the relationship between profession and work (professional activity). 5 What are the professions? Currently, there are more than a thousand specializations and areas of training and work. Each of them is unique in its own way and requires specific ideas and skills. All professions can be divided into sectors (by industry and scientific affiliation): economic, technical, construction, educational, psychological, etc. Regardless of the field of activity, each profession involves performing specific duties, knowledge of the chosen industry and the specifics of the work, the presence of certain ideas and skills within the specialty. In fact, without a professional education, you will not be able to master the desired profile or direction. 6 Directions in professional and labor activity of a person The higher the level of knowledge and skills of a specialist, the higher their chances of finding employment in a prestigious company, moving up the career ladder, getting a decent and high income, etc. At the same time, there are several areas of labor activity that

	<p>do not require specific abilities, theoretical baggage, and practical experience. This category includes such vacancies as courier (on foot), janitor, cleaner, janitor, handyman, etc. Here "professional skills" are developed in the course of performing duties: the courier learns to build optimal delivery routes, the cleaner-uses special cleaning products, special rags, sponges in specific conditions (surfaces, temperature conditions) , etc. Unfortunately, unskilled labor is the lowest paid. There are also professions that do not require long training. To master them, it is enough to pass small training courses, trainings, and get the appropriate certificate-admission to work. This category includes private security guards, operators and dispatchers, etc.</p>

Computers make it possible to work at home. Word processors make it easier to write letters and reports, and to do work for school or college. Children enjoy using computers, and multimedia, interactive software and virtual reality make learning more exciting. Large amounts of information can be stored in a database. Disadvantages of computers Many people do not like using computers, and would prefer to deal with a person instead. Computers can get viruses and damage software. Software often have bugs, and sometimes computers fail and people lose all the work they had done. Some children spend too much time playing computer games which can be very violent. Anyone can put information on the Internet, so it can easily be used by criminals. There are no laws to stop this yet, and it is extremely difficult to control the Internet. If a computer is not working properly, most people do not know how to fix it, and this be very annoying. Тема 7. Туризм. Виды отдыха.	<p style="text-align: center;">Act the dialogue:</p> <p>Adam: What do the forecasters say about this week’s weather? Kelly: There is a chance for an earthquake in our area, which is not good at all. Adam: Well, it’s not for the first time. Unfortunately, our state is prone to earthquakes. Kelly: When was the last time we had one? Adam: Last year, but the shakes were minor. Most people didn’t even feel them. Only those who live in the block of flats did. Kelly: I see. This time they say it’s going to be stronger. Let’s hope it won’t cause any destruction. Adam: What we experience here is nothing compared to some other places, which are prone to natural disasters. Kelly: What other natural disaster do you mean? Adam: Flood, droughts, tornado, tsunami, volcanic eruptions, avalanche, etc. Kelly: I know that India and Indonesia are highly prone to floods. Is that right? Adam: Yes, definitely. These Asian countries each year are at high risk. It gets especially dangerous during the rainy seasons. This February 6000 people were evacuated from their homes and offices as floods inundated the capital region. Kelly: I’ve also heard that tsunamis are frequent in Indonesia. Is that true? Adam: Yes, that’s another natural disaster which Thai people and their visitors often experience. It’s a very dangerous phenomenon, which can involve huge tidal waves. Kelly: How about tornadoes? Which places are more prone to this disaster? Adam: Tornadoes can occur in some states of the USA, Australia, Asia and most of Africa. Kelly: I wonder how do tornadoes form? Adam: They are normally associated with large thunderstorms. They are created by a column of warm humid air which begins to rise very quickly.</p>

	<p>Kelly: You know quite a lot about these things. Have you been studying the topic of «Natural Disasters»?</p> <p>Adam: Not precisely, but I had to write an essay on this topic once, so I know a bit about the danger that comes from such phenomena and about the ways of protection.</p> <p>Kelly: Well, in most cases people can be saved if they act quickly and corresponding to the situation. Besides I think that the forecasters' role in this case is rather important.</p> <p>Adam: You're right, but not always they can foresee the coming disaster.</p> <p>Kelly: I know. What a pity. In my opinion, if they had more sophisticated equipment, they would be able to forecast dangerous weather conditions in advance.</p> <p>Adam: Perhaps, that's what it is.</p>
<p>Тема 8. Страны изучаемого языка</p>	<p style="text-align: center;">Act the dialogue:</p> <p>All around the world, festive days like New Year's Eve are celebrated with fireworks. But here in Britain, there is one night that is very special.</p> <p>It's November the fifth, Bonfire Night, and I'm wrapped up warm for some autumn fun. Tonight's the night for lighting bonfires and setting off fireworks. Here in Winchester, preparations for the celebrations are under way and tonight it's all going to get very noisy!</p> <p>Bonfire Night parties take place in towns and cities across Britain. The Winchester event is free and attracts over twenty thousand people. Steve Lewis of the charity 'Round Table' is the volunteer in charge.</p> <p>Joe: Steve, what's the plan for tonight's celebrations?</p> <p>Steve: OK, tonight actually kicks off at 6pm in the city centre by our Guild Hall. There's a torch-lit procession where thousands and thousands of people follow a band through the city and we all process down to the fields here. And then we'll follow that by the lighting of the bonfire about 7.15. At 7.45 the fireworks will go off and the crowds will cheer.</p> <p>Joe: It sounds like a hectic night. How many people does it take to organise this?</p> <p>Steve: On the night itself, we have a hundred and eighty volunteers and many, many other people to help us out. So it's hundreds of people involved in an event of this size.</p> <p>Joe: And be honest, is this about history or is it just an excuse to have fun?</p> <p>Steve: Bonfire Night is about history. It all comes from history of England and the Houses of Parliament. But it is great fun, too – great fun for us to organise and put on and great fun for everybody who turns up.</p> <p>So how did this all start? Four hundred years ago, a man called Guy Fawkes planned to kill King James by blowing up the Houses of Parliament. It was called the Gunpowder Plot. It failed, and to mark the event rag doll 'Guys' are burnt on the bonfire and fireworks are set off. Fireworks are made using gunpowder.</p>

	<p>Leon's probably got the best job in the world. He lets off fireworks for a living.</p> <p>Joe: Leon, talk me through the sort of display you're going to put on.</p> <p>Leon: There's about four thousand fireworks which all create different effects. Some will go up and go bang, some will spin up there, some will crackle, there's whistles...</p> <p>Joe: What do you think it is about fireworks that the British public just love?</p> <p>Leon: It's a great tradition that we have here. If it wasn't for Guy Fawkes we wouldn't be stood here today. You know, it's a great... I love tradition.</p> <p>It's six o'clock and time for me to join the procession.</p> <p>OK, it's almost time for the fireworks now.</p> <p>Well, I thought that was fantastic – but what did the public think?</p> <p>Woman: Well, it was really nice to come up and meet up with my friends – and watching the fireworks, they were beautiful.</p> <p>Girl 1: I thought they were really good. They were even better than last year.</p> <p>Girl 2: They were really good and they were really colourful and they looked really cool.</p> <p>That's Bonfire Night over for another year – but there's always time for a final bit of sparkle.</p>

Дифференцированный зачет

Условием допуска к промежуточной аттестации (**дифференцированному зачёту**) является выполнение и защита (получение отметки «зачтено») всех практических занятий, прохождение всех тестов текущей аттестации с результатом не менее 75% по каждому.

Дифференцированный зачет проводится во **2 семестре** изучения учебного предмета.

Технология проведения дифференцированного зачета – выполнение комплексной контрольной работы по всем изученным темам.

Задания контрольной работы формируются из вопросов текущего контроля. Контрольная работа содержит задания в равной степени, охватывающие весь материал. Время выполнения контрольной работы 60 минут.

Критерии оценивания:

Оценивание осуществляется по четырёхбалльной системе.

Оценивание промежуточной аттестации – дифференцированного зачёта осуществляется по номинальной шкале – за правильный ответ к каждому вопросу задания выставляется один балл, за не правильный – ноль. Общая оценка контрольной работы осуществляется в отношении количества правильных ответов к общему числу вопросов в контрольной работе (выражается в процентах).

В процентном соотношении оценки (по четырёхбалльной системе) выставляются в следующих диапазонах:

“неудовлетворительно”- менее 75%

“удовлетворительно”- 76%-85%

“хорошо”- 86%-92%

“отлично”- 93%-100%

Dear Oleg,

Marry Christmas and Happy New Year! I hope the new year will be the best in your life!

I'm sending a single of the group Rammstein as a Christmas present. Hope you'll enjoy listening to their music.

With all good wishes from

Alex.
